

HOBBY STIRRERS

Simple multi-purpose stirrers

Simple multipurpose stirrers

Stirrer speed (rpm)	Thrust volume (l/min)
300	140
600	290
900	440
1200	580
1500	730

Use:

→ **For small batches.** Hobby stirrers are used for processing small quantities of products in kettles **from 25 to 100 l**. The stirrers are suitable for **different stirring and mixing processes**, such as:

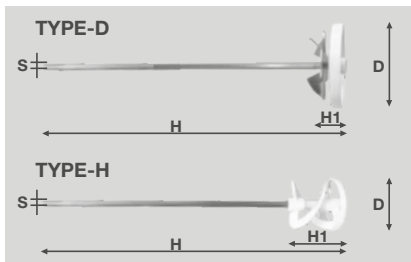

- mixing in of powdered milk and various powdered additives, for product homogenization, for liquid yogurt production etc.
- type D stirrer is more effective for crushing of larger pieces, such as fruit etc.

→ **Simple to use:** the stirrer is clamped onto an electrical drilling machine. The recommended stirring speed is 300–1500 rpm.

Made from material that protects the kettle:

→ The stirrer is made of **plastic**, so the kettle is not damaged during stirring. All used materials are food contact certified.

Stirrer speed (rpm)	Thrust volume (l/min)
300	130
600	260
900	390
1200	520
1500	650

Stirrer type	Dimensions (mm)			
	Stirrer diameter D	Stirrer height H1	Total height H	Hexagonal head S
TYPE-D	Ø 135	53	500	10
TYPE-H	Ø 95	93	500	10
